Re: Restriction of Hazardous Substances- Statement of Compliance

Current Rev: 2011/65/EU (RoHS2) & 2015/863/EU (RoHS3)

Date: January 2, 2021

As a distributor, Thin Metal Sales (TMS) does not melt any of the materials provided to our customers. Thin Metal Sales also does not knowingly add or expose our materials to any of the hazardous substances (lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls, polybrominated diphenyl ether, etc.) listed in the current EU RoHS Directive(s).

Thin Metal Sales does ensure our suppliers' compliance to the most current RoHS revisions and the material provided by TMS does not exceed the allowed levels. In the event one of our customers need further documentation from a producing mill noting specific compliance, TMS does keep current copies on file and will be glad to forward per request.

Best Regards,

Jonathan Mulvihill

President
